SEASON 3 EPISODE 6

ANDRÉS RAMÍREZ, PHD

ACCELERATING DISCOVERIES WITH SINGLE CELL AND SPATIAL TECHNOLOGIES

HOST: WOJTEK SIWEK

4TH FEBRUARY 2026, 12:00 PM
ROOM 320, ICCVS, KŁADKI 24, GDAŃSK

EVERYBODY IS WELCOME!

**ANDRÉS
RAMÍREZ**

Andrés Ramírez is a life-science professional with experience in advanced single-cell technologies. He earned his PhD from the Pontificia Universidad Católica de Chile, with a strong foundation in experimental biology and cellular analysis.

Next, Andrés transitioned to industry, holding specialist and advisory roles at Bio-Rad, where he supported flow cytometry platforms and applications. He later joined 10x Genomics, where he has been involved in advancing single-cell and spatial technologies.

Across his career, Andrés has deep technical expertise in single-cell analysis with a strong understanding of research needs, enabling effective translation of cutting-edge technologies into robust and impactful experimental workflows.
